

Ayush Dwivedi

Computer Science Student | Web Development | DSA & Problem Solving

Email: ayush06dwivedi07.com | Phone: +91 95552 43732 | GitHub: github.com/ayushdwivedi6 | LeetCode: leetcode.com/u/Ayush_Dwivedi6

PROFILE

Computer Science student with a strong foundation in C++, Data Structures and Algorithms, HTML, CSS and JavaScript. Experienced in building responsive front-end projects and solving programming problems. Currently strengthening web development skills while exploring JavaScript, React and AI/ML. Interested in software development and internship opportunities where I can learn quickly and contribute through practical problem solving.

EDUCATION

Bachelor of Technology (B.Tech) 2025 – Present Computer Science / Computer Science Engineering Currently in 2nd Year

Relevant coursework: Data Structures & Algorithms, Programming Fundamentals, Web Development, Computer Systems and related computer science subjects.

TECHNICAL SKILLS

Languages C++, Python (basics), JavaScript (basics)

Web HTML5, CSS3, JavaScript, Responsive Design, DOM

DSA Arrays, Vectors, Searching, Sorting, Binary Search, Problem Solving

Tools Git, GitHub, VS Code, Google Colab

Exploring React, AI/ML, Generative AI

PROJECTS

ScreenCare — Eye Fatigue Awareness Website

HTML, CSS, JavaScript

Designed and developed a responsive front-end website focused on screen-time awareness and eye-care information. Applied semantic HTML, responsive CSS layouts and JavaScript interactions to create a simple user-friendly experience.

Guess The Number — Interactive Web Game

HTML, CSS, JavaScript

Built a multi-level browser game with 15 levels, number-guessing challenges, hints and interactive game elements. Focused on clean UI, user interaction and front-end state handling.

CodeSoft Web Development Internship Projects

HTML, CSS, JavaScript

Developed a responsive business landing page and a functional calculator as part of a structured web-development internship project collection. Used CSS Grid, responsive design, DOM events and JavaScript logic.

DSA Problem Solving

C++

Practiced Data Structures and Algorithms through programming problems, with focus on arrays, searching, sorting, binary search and core problem-solving techniques.

ACHIEVEMENTS & ACTIVITIES

- Solved 250+ programming problems on LeetCode.
- Built multiple front-end projects to strengthen practical web-development skills.
- Participated in project and hackathon ideation around topics such as scam detection and deepfake verification.
